

Launching the CaptureView Manager

There are **2** ways to launch your **CaptureView Manager** software (if the program doesn't automatically launch):

Double-click the CaptureView Manager icon on the Desktop to execute the program.

OR

Click on the "Start" menu and go to "Programs."
Then go to the folder named "**CaptureView Manager**" and select it.

To **uninstall** CaptureView Manager, select "Uninstall CaptureView Manager" from the Programs folder.

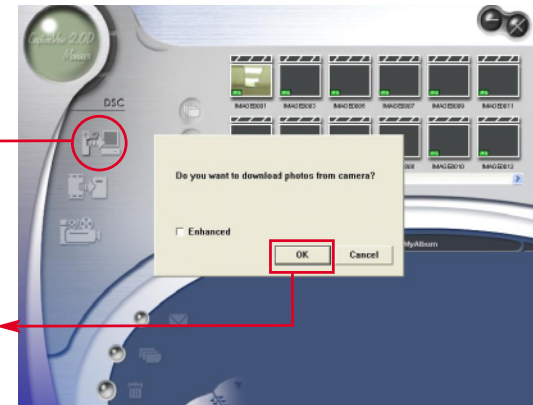

Album Mode

Downloading Pictures and Movies

1. Make sure your camera is connected to your PC via the USB cable.
2. CaptureView Manager displays. Click on the Album icon.
3. A dialogue box displays and asks if you want to "download" photos ("upload" if you have a CaptureView VGA model) from your camera.
4. Check "Enhanced Resolution" to enhance your images from the current resolution to the next level of resolution. For example, if your image has a 1 Meg resolution, it will be enhanced to a 2 Meg resolution. Note that an enhanced format requires more memory.
5. Click the "OK" button to begin downloading (uploading if you have a CaptureView VGA model).

Click this button to launch the Download dialogue box

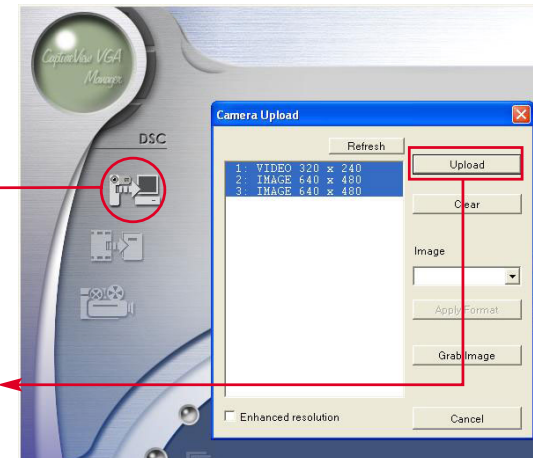

Click OK

CaptureView 2.0 D Download Manager Dialogue Box

Click this button to launch the Upload dialogue box

Click OK

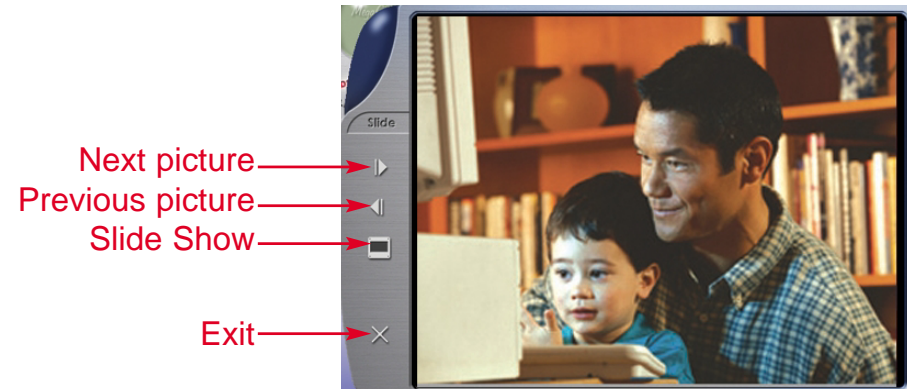

CaptureView VGA Upload Manager Dialogue Box

Some of the binocular- camera models have an internal PC Camera mode which operates at VGA and QVGA resolution. You may use your own software (such as VidCap32 or AmCap, which comes bundled with Windows) to take advantage of various features of the their software programs, such as live video capture, etc.
